

MN. Fathima Hasmath Nifa

BICT(Hons) in Software Technologies

+94 71 738 6062 | nifanilar@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFILE

Final-year Bachelor of Information and Communication Technology (Hons) undergraduate specializing in Software Technologies at South Eastern University of Sri Lanka. Skilled in software development, full-stack web and mobile application development, cloud computing, IoT, database management, and UI/UX design. Experienced in developing web, mobile, cloud-based, and IoT applications through academic and personal projects. Passionate about software engineering, problem solving, and building scalable, user-focused applications while contributing effectively to collaborative development teams.

EDUCATION

Bachelor of Information and Communication Technology (Hons)

Specialization: Software Technologies

South Eastern University of Sri Lanka

2021 – Present

CERTIFICATIONS

- AWS Academy Graduate - Cloud Foundations (AWS)
- AWS Academy Graduate - Cloud Web Application Builder (AWS)
- AWS Academy Graduate - Generative AI Foundations (AWS)
- Foundations of Prompt Engineering (AWS)
- Machine Learning I (Columbia)
- Fundamentals of Cloud Application Development (Microsoft)
- Deep Learning (Simplilearn)
- Data Analytics with AI (Sololearn)
- Programming Essentials in C (Cisco)
- CCNA: Introduction to Networks (Cisco)
- CCNA: Switching, Routing, and Wireless Essentials (Cisco)

RESEARCH

TamiRead: A Gamified Adaptive Tamil Reading App for Slow Learners in Sri Lanka (Ongoing)

PROJECTS

Cargo Monitoring System | *Flutter, ESP32, Supabase, IoT* | [GitHub](#)

- Built an IoT-based cargo monitoring system using ESP32 and multiple sensors for real-time temperature, humidity, light, motion, and tilt.
- Created a Flutter mobile application with Supabase integration for live dashboards, historical data visualization, and 0-100 integrity scoring.

Expense Tracker | *Node.js, Express.js, REST API, Azure, Azure SQL* | [GitHub](#)

- Designed a full-stack expense tracker with Node.js and Express.js, featuring budget alerts at 80% and 100% thresholds, spending charts, and secure bcrypt password hashing.
- Integrated 3 Azure Services (SQL Database, Blob Storage, and App Service) for secure data handling and application deployment.

Travel App | *Flutter, Supabase, Dart* | [GitHub](#)

- Developed a Flutter-based travel planning application with 6 core modules including authentication, destination search, trip planning, and user profile management.
- Connected Supabase backend services for real-time user data management and application storage.

To-do List Web Application | *Laravel, PHP, MySQL, Bootstrap, MVC* | [GitHub](#)

- Created a Laravel MVC web application implementing CRUD operations, MySQL database management, and responsive Bootstrap-based user interface.

FlashCard Quiz App | *Flutter, SQLite, Dart* | [GitHub](#)

- Designed a Flutter-based learning application with 8+ features including flashcards, category filtering, shuffle mode, animations, and progress tracking.
- Utilized SQLite for offline data persistence and efficient local storage management.

GPA Calculator App | *Android Studio, SQLite, Java* | [GitHub](#)

- Produced a native Android application for GPA and CGPA calculation with user authentication and SQLite-based academic record management.
- Implemented CRUD operations, and academic performance tracking.

EcoCycle - Sustainable Marketplace App Prototype | *Figma, UI/UX Design* | [Figma](#)

- Designed a sustainable marketplace prototype with 3 exchange modes: Sell, Donate, and Swap.
- Created a complete UX flow across 9+ features (community feed, map view, chat, wishlist, reviews), backed by user persona research.

TECHNICAL EXPERIENCE

- Developed Flutter and Android applications with REST API integration and cloud backend services.
- Crafted responsive web and mobile user interfaces using Figma, Adobe XD, and Marvel.
- Produced graphics, posters, and digital assets using Adobe Photoshop and Adobe Illustrator.
- Deployed cloud services using Microsoft Azure Virtual Machines, App Service, Azure SQL Database, and Blob Storage.
- Built IoT applications using ESP32, Arduino, sensors, and MQTT communication.
- Managed source code using Git and GitHub with branching and version control.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, JavaScript, PHP, Dart, C++
- **Web & Frameworks:** HTML, CSS, Bootstrap, Tailwind CSS, React.js, Node.js, Express.js, Laravel, MVC Architecture
- **Mobile Application:** Flutter, Android Studio (Java), Mobile UI Development
- **Cloud & DevOps:** Microsoft Azure (Virtual Machines, App Service, Azure SQL Database, Azure Blob Storage), AWS, Cloud Deployment
- **Databases:** MySQL, MongoDB, SQLite, Supabase
- **API Development & Tools:** REST APIs, JSON, Postman, API Integration, Authentication
- **Version Control & Collaboration:** Git, GitHub, Branching, Pull Requests
- **UI/UX Design & Creative Tools:** Figma, Adobe XD, Marvel, Adobe Photoshop, Adobe Illustrator, Prototyping
- **IoT & Embedded Systems:** ESP32, Arduino, MQTT, Blynk, Sensor Integration, Real-Time Monitoring, Wokwi, Tinkercad
- **Software Engineering:** Object-Oriented Programming (OOP), CRUD Operations, Software Development Life Cycle (SDLC)
- **Operating Systems:** Windows, Ubuntu Linux, Windows Server, Ubuntu Server

SOFT SKILLS

- Communication
- Teamwork
- Problem Solving
- Adaptability
- Time Management
- Critical Thinking

LANGUAGES

Tamil (Native)

English (Professional Working Proficiency)

Sinhala (Basic)
